

# Pressure Washers

Pressure Washers are an incredibly versatile tool...an excellent “cleaning machine” for a variety of surfaces and applications. Here are just a few:

- Preparing a house for paint
- Cleaning concrete walkways
- Removing loose paint
- Cleaning any masonry surface such as chimneys, walls, decorative features
- Cleaning driveways and sidewalks
- And more!

There are some cautions related to pressure washers. Primarily – they produce a *very strong stream of water!* So much so that wood and softer masonry surfaces can be damaged by using the wrong tip or operating the spray nozzle too close to the surface. We send our pressure washers out with four tips:

- RED** – 0 degree nozzle for aggressive removal
- YELLOW** – 15 degree nozzle for scouring
- GREEN** – 25 degree nozzle for general washing
- WHITE** – 40 degree nozzle for light washing and rinsing

## Rental Information & Instructions
